

Training

20th ESPU Educational course by the Educational Committee

4th - 5th October 2024
Berlin, Germany

On behalf of the ESPU Educational Committee we cordially invite you to the 20th Educational Course on Pediatric Urology.

During one and a half day, we will present and discuss the major topics of pediatric urology. The course will give you an overview of the basics in clinical decision-making and treatment. The program includes short presentations and pre-recorded videos of surgical procedures. We will have plenty of time for case discussions, also like the one taking place during the FEAPU exams.

All pediatric surgeons and urologists in training, fellows of pediatric urology and everyone who is interested and dealing with congenital and acquired disorders of the genital and urinary tract are warmly welcome!

Please register here
